## ORTHOPEDIC REHABILITATION PROGRAM

Includes comprehensive clinical evaluation and individualized care plan by our highly trained and skilled team of Nurses, Physical and /or Occupational Therapists in order to assist the patient in independent functioning by improving mobility, strength, and ability to perform activities of daily living (ADL).

- Falls are the leading cause of injury and death among seniors. Over 95% of hip fractures are caused by falls.
- One out of three seniors falls each year, but less than half of them talk to their healthcare provider about this.
- 2.4 million non-fatal falls were treated in ER department and more than 722,000 of these patients were hospitalized. (2012 CDC data).
- People age 75 and older who fall are four to five times more likely than those age 64-75 to be admitted for a long-term care facility for a year or longer.

### PROGRAM HIGHLIGHTS:

- Comprehensive assessment of physical and functional status
- Individualized patient care management by skilled professionals
- Multi-disciplinary care coordination
- Medication safety & management - all prescription and over the counter meds
- Balance and gait review
- Home safety review
- Patient and family caregiver education, motivation, and behavior skills

### BENEFITS:

- Addresses patient needs in a convenient and responsive manner
- Collaborative approach to patient condition management
- Facilitates care transition and independent functioning
- Patient outcomes and independence
