## BREATHE BETTER - COPD Management

Intermittent Skilled Care in the comfort of patient's home

Chronic Obstructive Pulmonary Disease (COPD) is a major cause of disability, and it's the third leading cause of death in the United States. 12 millions of people are diagnosed with COPD and COPD exacerbations result in about 1.5 million emergency room visits every year in the US. COPD develops slowly and symptoms often worsen over time and may prevent the person from doing even basic.

Our Breathe Better program, with focus on treatment and education, takes a multi-disciplinary approach to the care and treatment of acute and chronic pulmonary disease and is designed to improve independent functioning and patient outcomes. The program may best serve the patients who are:

- Newly diagnosed with COPD
- Recently hospitalized or have had multiple hospitalizations
- Have had recent episode of Pneumonia
- With shortness of breath and/or occasional exacerbations
- Using a nebulizer
- With decreased lung function (FEV1 of 80% or less)
- Are home bound, willing and able to participate in the plan of care

### PROGRAM HIGHLIGHTS:

- ✓ Individualized patient care management by skilled professionals
- ✓ Multi-disciplinary care coordination
- ✓ Medication safety & management - all prescription and over the counter meds
- ✓ Care coordination with physician office and patient risk management
- ✓ Patient and family education, condition management & behavior skill support

### BENEFITS:

- ✓ Addresses patient needs in a convenient and responsive manner
- ✓ Collaborative approach to patient condition management
- ✓ Reduces ER visits and hospitalization
- ✓ Improves independent functioning and patient outcomes
